

INSTITUTIONS

Give each cohort a common starting point.

Bring faculty expertise into a branded academy that serves successive cohorts. Learners can study shared materials independently, while lecturers and mentors use seminars and placements for feedback and practice.

INSTITUTIONAL PLAN / INDICATIVE CAPACITY

1 TB	Unlimited	3,000
file storage	courses	monthly active learners

15 published academies • 25 administrator seats • Free Creator Launchpad workshops

Coordinate a shared programme

Agree which materials the programme lead maintains, which courses each unit contributes and what participants should complete before a seminar.

ACADEMY FEATURE	HOW YOU CAN USE IT
Branded academies	Give programmes a recognisable home for participants across faculties or sites.
Curriculum & media	Keep the core lecture, reading and model assignment together for every cohort.
Programme administration	Plan which administrators will manage academies and maintain the course catalogue.
Assignments & learning paths	Connect required courses and ask participants to submit work against the institution's programme criteria.
Discussions & Q&A	Participants can compare local practice and ask faculty to clarify the shared standard.
Progress reporting	Define the reporting scope with your programme leads and use progress reviews to plan support.

Choose a delivery model by programme

A continuing education course can run entirely online. A practicum can use the same online materials before observed work at a teaching site.

What the plan includes

Academy capacity	15 published academies, 25 administrator seats and up to 3,000 unique monthly active learners.
Courses & storage	Unlimited courses and 1 TB of file storage.
Reporting & support	Reporting and support are scoped with your institution.
Learning paths	Multi-course certification learning paths and academy-branded course certificates.

Institutional is a sales-led plan. Confirm the academy structure, capacities, reporting and support with your programme and technology teams.

LEARNER VIEW

My Learning

Participants can revisit feedback prompts and model activities as they prepare for observed teaching.

Desktop & Tablet	Open lessons and assessments in a browser.
PWA	Install the web app for access from the home screen.
Mobile App	Revisit supported text, audio and resources offline. Hosted video generally needs an internet connection.

One teaching practicum across sites

A teacher-training institute wants trainees at two partner schools to plan a lesson and show how they know pupils understood it. Faculty agree on a common model and assignment.

Before the placement

Each trainee studies the model lesson, drafts a learning objective and shares a proposed check for understanding.

At the teaching site

A mentor observes the activity. Back in the course, the trainee writes a reflection and compares it with a peer's account from the other school.

FROM AN ACTIVITY TO EVIDENCE

Trainee	"My pupils finished the worksheet. What else should I record?"
Peer	"I kept an example of a wrong answer that changed how I explained the question."
Mentor	"Choose one response. What did it tell you, and what did you do next?"

The institute can use the same brief next term. Each mentor still chooses examples from the classroom they observed.

See how it fits your programme

Bring one programme outline and the units that contribute to it.
