

TUTORS & EDUCATORS

Turn your recorded lessons into a paid course.

Bring your videos, worksheets and quizzes into an academy under your own name. Offer a standalone course for students who learn at their own pace, or make it part of your face-to-face classes so students can prepare, practise and ask questions between lessons.

CREATOR PLAN AT A GLANCE

50 GB	Unlimited	200
file storage	courses	monthly active learners

1 published academy • 1 administrator seat • Free Creator Launchpad workshops

How to offer a paid course

Build a course around a topic you teach regularly. Sell online access on its own or include it in your tuition fee as a hybrid option.

ACADEMY FEATURE	HOW YOU CAN USE IT
Academy branding & links	Share one academy link with former students, families and people they refer. Your name is on the course.
Course builder & media	Sequence your recorded lessons, pair each with a worksheet and show students what to study next.
Quizzes & assignments	Add a quiz for independent practice. Set an assignment when you want to see a student's method.
Learner access	Enrol someone who buys the online course, or give your in-person students access as part of their tuition.
Course discussions & Q&A	Learners can ask you about a difficult step and compare approaches with classmates.
Progress reporting	See how far students have worked through the course and decide who could use a follow-up.

Who handles payment?

You set the course fee and collect it directly from the learner or family. Your xtraLesson subscription is a separate cost.

What the plan includes

Academy capacity	1 published academy, 1 administrator and up to 200 unique monthly active learners.
Courses & storage	Create as many courses as you need. The Creator plan includes 50 GB of file storage.
Reporting & support	Core progress reporting and standard support.
Course recognition	Academy-branded course certificates for tutors who want to recognise completion.

LEARNER VIEW

My Learning

Students sign in to find their courses and continue where they left off.

Desktop & Tablet	Open lessons and quizzes in a browser.
PWA	Install the web app for access from the home screen.
Mobile App	Revisit supported text, audio and resources offline. Hosted video generally needs an internet connection.

Six recordings, one revision course

Every exam season, former students ask Amina to teach algebra again. She picks six of her clearest recordings, puts them in revision order and adds a worksheet and a short quiz to each topic.

Standalone online course

A former student can't attend evening classes. He pays Amina directly, joins the course and works through the lessons on his own schedule.

Hybrid tuition

Amina includes the same course in her Saturday tuition fee. Her class watches the factorisation lesson and tries the quiz before they meet.

AN EXCHANGE IN THE COURSE DISCUSSION

Learner	"I wrote $x^2 + 5x + 6$ as $(x + 1)(x + 6)$. What did I miss?"
Classmate	"I multiplied mine out to check the middle term."
Amina	"Good check. You need two numbers that multiply to 6 and add to 5. Try 2 and 3, then expand the brackets."

On Saturday, Amina uses the question to start a board exercise. The online learner can revisit her answer and try the next problem at home.

Bring your first course to Creator Studio
